

J-Wave

Activation

Slim Profile, Germ-free Automatic Door Activation Switch

Active Infrared Technology

- **Slim Design**
Jamb style, low profile design facilitates a tidy installation on door frames or guiderails.
- **Eliminate Contamination**
Touchless design reduces the spread of germs and improves accessibility in healthcare, retail and commercial settings.
- **Fast Reaction Time**
Detection distance of up to 30cm with an ability to detect very fast hand movements in front of the switch body.
- **Tough & Illuminated**
Made from a tough, polycarbonate material with a constantly illuminated LED so that the J-Wave can be easily located in dimly lit environments.
