

Product	Touchless Antimicrobial 4" Activation Pad
Product Codes	PAD1CP1 (Hardwired)

PRODUCT INFORMATION

Square hardwired activation pads with scratch resistant, antimicrobial acrylic label. Primarily used to activate swing/sliding automatic doors.

The SteriTouch® activation pads offer protection against a range of bacteria including E. coli, MRSA, Salmonella and Legionella, as well as black mould growth, biofilm and fungi. Mould growth is responsible for costly redecoration cycles and respiratory complaints, especially in damp and humid environments where its prevention is otherwise difficult.

SteriTouch® works continuously and effectively to restrict this growth before it appears.

It eradicates the bacteria which cause contamination and infection, as well as those responsible for odours and staining. The antimicrobial effect also protects the product against degradation, extending its use!

All housings are protected by SteriTouch® which means 99.9% of germs will not grow on them! The acrylic signage is also protected by SteriTouch® which means you have a highly protected activation pad.

FEATURES

- 124mm h x 124mm w x 32mm d
- 12 - 28Vdc
- Up to 90mm activation range with 4 position sensitivity adjustment (from touch to hands free)
